SUBJECT INDEX TO VOLUME 4

Annular enclosure with a cold inner cylinder, 365
Automotive heat exchangers, pressure drop, 111

Boiling in channel with porous matrix, 59

Counter-current flooding in vertical-to-inclined pipes, 95

Electrodynamic enhancement, 19

Filmwise condensation heat transfer, 71

Heat transfer from discrete source to circular liquid jet, 41
Heat transfer to dispersed whirl flow, 153
Heat transfer to thick-finned tubes, under frosting conditions, 1
Helical steam-generating channels, and temperature, 189
Horizontal rectangular channels, and thermal instability, 353

$LiBr/H_20$ films falling on horizontal tubes, 331
Liquid-liquid direct contact, 309

Mass transfer experiments on particles, 235
Mist flows in tubes, 291

Nonuniform megawatt heat fluxes, 281

Packed capsules with solidification, cold storage and, 263
Parallel-plate duct, roughness element and, 319
Plane free convective flow, velocimetry applied to, 253

Temperature field visualization, with liquid crystal method, 93
Thermohydraulic facility, heat loss measurements, 153
Tubes submerged in circulating fluidized bed, 343
Two-phase double-loop thermosyphon, 171

Vertically ventilated enclosure, natural convection in, 199

Wavy liquid film, measurements of, 217
